

COMPANY PROFILE

Empowering Business through Spatial Intelligence

TGIS (Total Geo-Spatial Information Solutions) is a South African technology and integration company that enables organisations to run better through the intelligent integration of **People, Processes, Systems, Data** and **Technologies**.

 Established 2000 | www.tgis.co.za

OUR PURPOSE

We enable clients to achieve their purpose by providing affordable solutions that ensure efficient business processes and exceed customers' expectations.

OUR PHILOSOPHY

Sustainable transformation starts with capable people, reliable data, effective processes and integrated technologies working together to achieve measurable outcomes.

WHAT WE DO

TGIS designs, develops, implements and supports business solutions through our spatially based Integrated Management Information System (IMIS), powered by GIS, workflow, document management and communication technologies.

We capture, clean and verify data, populate system databases, and provide maintenance, support and continuous skills transfer.

CORE SOLUTION AREAS

-  **Integrated Management Information Systems (IMIS)**
End-to-end business process & workflow automation
-  **GIS & Spatial Data Management**
Reliable maps, spatial analytics & audit trails
-  **Asset & Infrastructure Management**
Asset registers, lifecycle & infrastructure intelligence
-  **Revenue Enhancement & Land Audit**
Land, valuation, billing, indigency & meter audits
-  **Data Cleaning & Verification**
Clean, accurate, auditable and up-to-date data
-  **Workflow & Document Management**
Process driven, paperless & audit ready
-  **Mobile & Field Applications**
Field data capture, inspections & service delivery
-  **Public Engagement Platforms**
Online portals for communication & transparency
-  **3D Mapping & Spatial Intelligence**
3D mobile mapping, advanced analytics & insights
